

Wear protection 2.0

Solutions and products

Spare and wear parts
made of different
materials

For concrete factories

Quality standard & experiences

Chilled cast iron

In different alloys for mixer linings, mixing tools, shafts etc.

Decades of experiences are the groundwork of highly wear resistant products!

How do you call wear parts, which last nearly forever?

Because of decades of experiences in using five different types of wear-resistant materials steel, chilled cast iron, rubber, plastic materials, especially polyurethane, and ceramics, we are able to adjust our products according to the special cases of use and requirements. We offer and deliver solutions not only products.

In this brochure you will find these wear resistant materials and their usual types of application.

If you got any questions, don't hesitate to ask us about possibilities of wear-reduction
+49 (0)511 48 30 28/29.

RWE PU

Highly wear resistant Polyurethane moulded parts. Sheets with our without steel inlays.

RWE VM

Highly wear-resistant steel for heavy duty applications

Your advantages

- Decades of experiences
- High quality
- Wide range of materials
- Short delivery time
- Nearly all parts are available from stock
- Own product development

Concrete
and asphalt
mixers

Quality & competence

Mixing tools for all brands

- Blades
- Scrapers
- Arm protection
- Mixing arms
- Many special parts for special applications

Made of:

- Polyurethane
- Chilled cast iron
- With hard-materials

fairschleißtechnik means:

- Products are made in EU
- Fair payment of manufacturer
- Fair payment of employees
- High standard of job safety
- High standard of environmental safety
- High standard of documentation
- Constant product quality
- Nearness user-producer
- Security of supply

Decades of experiences are the groundwork of highly wear resistant products!

Quality & competence

Elevator buckets and accessories – according to DIN standard or by sample

- Made of steel
- Made of stainless steel
- Made of polyamide plastic

Discharge funnels

For stationary concrete mixers

- Inlay for discharge funnels “like filter bags”
- Made of RWE PU 90 Polyurethane with a five year warranty
- Nearly all dimensions are possible
- With or without steel cage
- Very good gliding properties
- Also for use in existing funnels

Mixer linings for

- Twin shaft mixers
- Single shaft mixers
- Planetary mixers
- Ring-pan mixers
- For all brands

Made of:

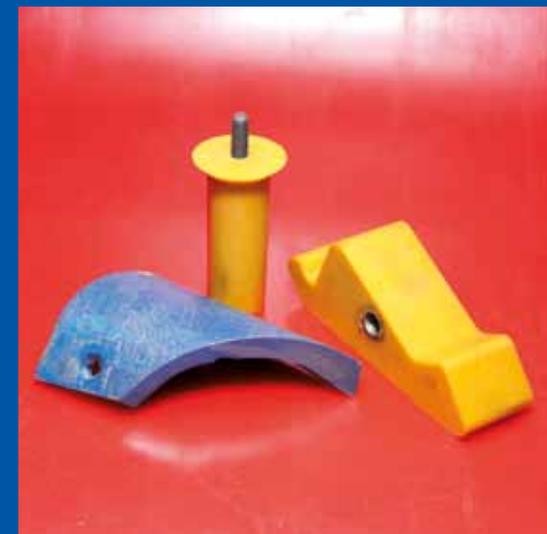

- Chilled cast iron
- Highly wear resistant steel RWE VM
- Welded steel plates
- Polyurethane
- Ceramics

Spare parts for precast concrete factories

- Parts for concrete mouldings
- Spare parts for concrete pipe manufacturing machines
- Bars for grippers
- Rocker arms

Scoops

- New and regenerated
- With polyurethane bars for noise reduction
- For all brands

In our new
Online-Shop
You can get information
and place offers around
the clock.

Many of our products
are not suitable for our
online shop, but they are
still available at:
